MARK AND DRILL MOUNTING HOLES ON DOOR

1. Mark horizontal centerline by matching it to the centerline of exit device, which can be found on the inside face of door.
2. Apply template to the door using centerline. Refer to Applications Section on page 1 to determine the location of the vertical centerline. This vertical centerline should match the centerline of exit device located on the inside face of door.
3. Mark and drill 7/16" holes for mounting posts as shown on template.
4. Mark and drill 1/2" holes for the trim actuating shaft, which mates with the exit device. See exit device instructions for details.

INSTALL ESCUTCHEON TRIM

1. Insert trim mounting posts and actuating shaft through door.
2. Mate trim actuating shaft with cam on back of the device chassis.
3. Fasten the trim from the device mounting plate with provided screws.
4. Test installation by operating lever / knob handle or key to verify trim activates exit device.
5. Note: Dummy trim is only for pulling door, handle does not rotate.
